## Middlesex.

TO HER MAJESTY'S JUSTICES OF THE PEACE FOR THE COUNTY OF MIDDLESEX, IN GENERAL QUARTER SESSION ASSEMBLED.

> The EIGHTEENTH ANNUAL REPORT of the Committee of Visitors of the County Lunatic Asylum at Colney Hatch.

THE Reports of the Officers and the returns annexed hereto will afford to the Court a full account of the progress of the Asylum during the year 1868.

With reference to the state of repair in which the Asylum and buildings in connection with it now are, the Committee are able to report favourably. The long continuance of dry weather in the past summer has caused several rather serious settlements in the building. These have, however, been attended to, and notwithstanding the extra costs thereby incurred, the Court will see that the expenditure in repairs contrasts satisfactorily with that of former years. Improvements in warming, ventilation, and lighting have been continued; more Ward furniture and means of recreation and instruction for the Patients have been provided, and the new Bath-house for the Female Patients, having been completed, is in full operation. The conduct of the Officers, Attendants, and Servants (with some exceptions in the case of subordinate Officers) has been good.

The treatment and care of the Patients have been generally very satisfactory. Their health has been good, and they have again been free from epidemics.

A few cases of Smallpox among the Attendants occurred in the early part of the year; but the means taken by the Committee and the Medical Superintendents were successful in staying the spread of the disease.

The excursions and occasional picnic parties in the neighbourhood, and the lectures, readings, and other entertainments have been continued.

One suicide has occurred in a manner which shows how impossible it is, with an increase of liberty to the Patients, to prevent an occasional catastrophe of this kind. A Patient, named William Burroughs, who had frequently been out for walks in the village, in returning to the Asylum with a party under the care of an Attendant, suddenly jumped over the railway bridge, and, falling a depth of 50 feet, sustained such injuries as to cause his death within a few hours. An inquest was held on the body, and the coroner's jury returned a verdict of "Death from the effects of a fall from the bridge." This is the only accident of a serious character which has occurred in the Asylum during the past year, and with 2,065 Patients, many of them being dangerous both to themselves and others, the Committee feel satisfied with the vigilance shown by the Attendants to their duties.

A few instances of misconduct have occurred amongst

the subordinate Officers and Attendants, which have made it necessary for the Committee to dismiss one Head Attendant and ten ordinary Ward Attendants during the year.

The establishment of the new Bath-house for the Female Patients has rendered several Bath-rooms in the Wards unnecessary, and these being converted into bed-rooms, have given additional accommodation for 21 Patients, at a cost of  $\pounds 1,300$  only.

The pressure for accommodation for both Male and Female Patients has been considerable throughout the year; and a large number of applications for accommodation have necessarily been refused, although during the last month the applications have been much less in number.

In an interview which took place between the Commissioners in Lunacy and a deputation from the Committee in April last upon the subject of affording increased accommodation, the deputation assured the Commissioners that, with the exception of the small additional amount of accommodation to be obtained from the conversion of the bath-rooms, there was no possible mode of providing for any further number of Patients in the Asylum, but that with a view to afford admission to a few of the very urgent cases, the Committee had recently offered to exchange chronic quiet cases for more urgent ones with the different parishes; and the Commissioners having urged them to pursue this course as far as possible, a circular was addressed to the different parishes and unions on the subject. In consequence of this notification, 29 Male and 12 Female Patients of a harmless character have been removed to workhouses in exchange for a similar number of recent or violent cases.

The Committee have entered into an arrangement with the Managers of the Metropolitan Asylum District Board for the making up of the clothing and bedding for the Imbecile Asylum now in the course of erection at Leavesden. By this arrangement the Patients will be supplied with profitable employment, and the moderate cost of the work will be advantageous to the Leavesden Asylum.

The annual visit of inspection by two of the Commissioners in Lunacy was made at the end of October last. A copy of the entry made by them on the occasion is annexed hereto.

Early in the year the Committee lost, by the death of Mr. Busk, a valued friend and an able colleague, whose clear judgment and courteous manner were much appreciated by the Committee.

The efforts of the Chaplain to improve the moral and social position of the attendants, domestics, and others, as well as to promote the spiritual welfare of those Patients who are capable of profiting by his ministration, have been very satisfactory.

Miss Culling, one of the two Matrons, having after a service of upwards of 14 years become so completely and permanently enfeebled by ill-health as to be unable to continue to perform her duties, tendered her resignation, and the Committee granted her a retiring pension of  $\pounds 120$  a-year, which has since been confirmed by the Court.

Upon Miss Culling's retirement, the Committee determined upon placing both divisions of the Female Department under the superintendence of Miss Builder, the other Matron, and they appointed an Assistant Matron to act under her. This arrangement has now been in force six months, and appears to be working very satisfactorily.

At the beginning of the winter the sudden and alarming illness of Mr. Marshall, the highly-valued Superintendent of the Female Department, arising in great part from the effects of a kick by a Patient, gave the Committee great anxiety. For many days his life was in imminent danger, and from the shock to his system he is still unable to return to the Asylum. The Committee have consequently refrained from calling upon him for his Annual Report.

Mr. Marshall has been Medical Superintendent of the Female Department for more than 16 years, during which time he has maintained the entire and unshaken confidence of the several Committees. His absence has therefore been a serious loss, and the Committee will be much gratified to see him able to resume his important duties.

The Committee, immediately after Mr. Marshall was taken ill, took steps for ensuring the due superintendence of the Female Department, and they appointed Dr. Adam, the Assistant Medical Officer of the Department, to be Acting Superintendent of one Division, and Dr. Shaw, the Assistant Medical Officer of the Male Department, to be Acting Superintendent of the other division. These gentlemen have the superintendence of the Patients, and the Matron has been entrusted with the domestic management and the supervision of the nurses; and the Committee feel that it is only due to these Officers to record that they have done everything in their power to make up for the loss of Mr. Marshall's services, and to maintain the efficiency of the Institution. Dr. Shaw's place as Assistant Medical Officer has been filled up for the time by Mr. R. Harding.

The Committee are gratified in being able to report to the Court that during the past year they have been enabled twice to reduce the weekly maintenance rate, viz. : in April last from 10s. 6d. to 10s.  $2\frac{1}{2}$ d., and in December last to 9s. 11d.

On the whole, though many circumstances have arisen which have caused anxiety, and especially the Chancery suit with the Edmonton Local Board referred to in the Special Report submitted to the Court, the Committee feel that they have great reason for thankfulness in the prosperity of the Asylum, the general good conduct of their Officers, many of them of old standing, and in the general good health of the Patients.

The following Members of the Committee will retire, viz.:—Messrs. Ballantine, Bird, Bodkin, Halsey, and Twells. And these gentlemen will by their retirement, in addition to the vacancy occasioned by the death of Mr. Busk, create the six vacancies required by the Standing Orders of the Court.

All which is submitted, &c.

### W. H. WYATT, Chairman.

COLNEY HATCH ASYLUM, 19th January, 1869.

## APPENDIX.

Copy of Entry made by the Commissioners in Lunacy on their Visit to the Asylum.

> COLNEY HATCH ASYLUM, 24th October, 1868.

In the course of the last Four days we inspected the Asylum in its several Departments, and saw all the Patients excepting two Men and five Women absent on trial.

We have to report the following as the changes in the Patients since the visit of our Colleagues, 8th November last, and their present numbers :—

				Male.	Female.	Total.
Admitted	• •	• •	• •	187	158	345
Discharged	l	• •	• •	101	59	160
"	of whom :	recover	ed	65	41	106
Died .		• •	• •	87	74	161
Present nu	mbers on	books	• •	824	1,239	2,063

Of the Patients discharged not recovered, 37 (26 Men and 11 Women) were removed as harmless chronic cases in exchange for recent and acute cases, to their respective workhouses, the majority to St. Leonard's, Shoreditch, and Hackney, and the remainder to the workhouse of St. Margaret and St. John, Westminster.

With two exceptions the deaths were from ordinary causes. The exceptions were (1), a Male Patient who when out walking with five others under the charge of an Attendant, threw himself from a Railway Bridge, and (2), a Female Patient who cut her throat with a knife. Full particulars in reference to each case were duly reported to our Board. In these two cases only have Inquests been held since the last visit.

The weekly charge for maintenance is now 10s.  $2\frac{1}{2}$ d.

The beds at present unoccupied (including those in the padded rooms), are only four in the Male Division and eight in the Female. Two of the former and five of the latter are reserved for the Patients out on trial, so that the beds properly considered as vacant are only two on the male side and three on the Female.

In reference to the question, one of pressing and increasing urgency, of the accomodation provided for the Pauper Lunatics of the County, it is very important to state that since the last visit, a period of less than twelve months, 562 Lunatics viz:—278 of the Male and 284 of the Female sex have been refused admission from want of room; the Lunatics enumerated having been all different individuals. Upon the subject generally of the necessity which exists for the extension of Asylum accommodation in Middlesex without further delay, on speculation upon the contingent relief which it is thought will ultimately be afforded by the District Chronic Asylums, under the Metropolitan Poor Act, we desire to repeat the observations in the last Report,

The sanitary state of the Asylum is good, the Patients last registered as under Medical treatment being 33 in the Male Division, and 175 in the Female.

The records having reference to Divine Service, Employment, and Out Door Exercise and Recreation, suggest nothing for special observation on this occasion. The Chapel which will accommodate about 500 Patients is filled at the Sunday services.

We are assured that every effort is made to occupy usefully as many Patients as practicable.

There have been since the last visit as many as 224 Excursions and Picnics beyond the grounds of the Asylum, of which as many altogether as 1,697 Patients partook.

Within the Asylum there have been a Winter and a Summer Fête, fifteen Balls, three Dramatic Representations, three Exhibitions of the Magic Lantern, two Concerts, and two Lectures. The total attendance at the above was 3,655.

According to the Medical Journals the instances of seclusion since the last visit have been 110 in the Male Division, and 834 in the Female, the Patients secluded having been 73 in the former and 165 in the latter.

Since the last visit 12 destructive Male Patients have had their hands confined by gloves at various times and for varying periods, in most cases for self protection. With a similar object and for surgical reasons, or to prevent suicide, two other Male Patients have been subjected to mechanical restraint of a mild form.

The system of night attendance continues to work very satisfactorily.

We have to report most favourably of the general cleanliness and good order of the several Corridors, Day-rooms, Dormitories, Beds, and Bedding. Due attention appears to be given to warming and ventilation, and the atmosphere throughout was untainted. Much has been done since the last visit in the way of painting and decoration, additional framed prints, and a further supply of books and periodicals have been constantly accessible to the Patients.

We have specially to notice as respects the Female Division the introduction of additional couches for the sick, and the formation of a general Bath Room containing 20 Baths. The Bathing is distributed over five days of the week, morning and afternoon, and by this means, the supply of water being abundant, every Patient has a separate Bath.

On the Male Side the Bathing arrangements are less satisfactory as respects the practice of bathing, with some exceptions, as many as three Patients in the same water.

The personal condition of the Patients generally on the days of our visits was very satisfactory. Very few Patients wore dresses of a strong or special kind.

The Male Patients without exception were quiet and orderly, and we were especially impressed favourably with the improved condition and demeanour of the Inmates of Wards 5, 11, 14, and D, assigned to Patients of the most violent and dirty class.

In some of the Female Wards there was considerable excitement and noise.

No Patient of either sex complained of ill treatment on the part of the Attendants, although great numbers appealed to us for liberation.

In reference to the Staff of Attendants, we would suggest the expediency of adding one in B 3 Male Ward, containing 52 Patients requiring constant attention on account of their helpless state and dirty habits, many also being epileptics, three Attendants as at present are in our opinion not sufficient.

The Turkish Bath is in active and beneficial operation. We witnessed its application, and from the reports made to us upon the subject, it is we think to be regretted that from its small extent, its use is necessarily much limited and infrequent.

The Dinners in the Hall and Wards on the days of our visits were good and abundant and comfortably served.

We have again to advert to the very inconvenient and objectionable form in which the cases are kept, by the substitution for the Statutory Case Books of loose sheets filed in covers. We are of opinion that this is not in compliance with the Act, and that the cases should be duly recorded in Books.

Miss Culling, Matron for many years past of one of the Female Divisions, has retired upon a superannuation allowance of £120 per annum, and Miss Builder, Matron of the Second Division, has been appointed Matron of both Divisions at a Salary of £300, with an Assistant at £70.

In the course of our visits to the Male Division, we received every information and assistance from Dr. Sheppard, and from Dr. Shaw, by whom he is ably aided.

On the Female side, owing to the sudden and serious illness of Mr. Marshall, we were accompanied by Dr. Adam, who showed an intimate knowledge of the cases, and also by Miss Builder.

> (Signed) R. W. S. LUTWIDGE, ROBERT NAIRNE, Commissioners in Lunacy.

#### JOHN WALKER,

Engineer.

## REPORT OF THE MEDICAL SUPERINTENDENT OF THE MALE DEPARTMENT.

ALTHOUGH the Department with which I am officially connected as Medical Superintendent has not been so crowded during the past as in the previous year, it has still been necessary to refuse admission to a number of applicants.

There have been 213 Admissions in 1868, while in 1867 there were only 147.

On the 1st day of January, 1868, there were 820 Male Patients in the Asylum; on the 31st of December there were 818. The daily average of the year is represented by 821. The total number under treatment has been 1,033.

The discharges have been 111, of whom 73 are classified as "Recovered," and 38 "Relieved." The great majority of the latter have been harmless Imbeciles, who have been removed to their respective parishes in exchange for refractory, though for the most part equally incurable, Patients.

The Recoveries will be found to represent 8.89 per cent. upon the daily average—2 per cent. higher than in the previous year; and 34.27 per cent. upon the admissions. The Deaths have been 104-12.6 per cent. upon the daily average.

This number would not be so great if the Medical Officers of the different parishes were more careful not to send us Patients in an absolutely dying condition, who might with equal comfort and safety have taken their farewell of life upon the bedsteads of the workhouse. In many cases the fatal issue is precipitated by the journey to the Asylum. There is no excuse for sending a Patient to us (as was done by one of the parishes in the past summer) in the last stage of pulmonary consumption, and assigning as a reason for such a step that he disturbed the other Patients in the workhouse Infirmary by his incoherent ramblings. Did he not do the same to the Infirmary Patients here?

I may take this opportunity of alluding to the number of cases brought and certified to be "recent" and "uncomplicated with paralysis," the investigation of whose history often reveals long standing disease, and the observation of whose physical condition discloses at once the hopelessness of general paralysis and decay.

The number of casualties during the past year has been 758. One of these only was of a really serious kind, and constituted the first suicide which has taken place in the Male Department during my tenure of office.

On September 23rd a Patient who had frequently been in the habit of joining the walking parties outside the Asylum grounds, on passing over the railway bridge contiguous to the Asylum, got upon the parapet wall and precipitated himself on to the line below. Sustaining serious internal injuries of the chest, and fracture of the right arm, he died in about an hour. A coroner's inquest was held, and the jury completely exonerated the Asylum authorities from blame. It may be as well to state that a Patient who witnessed the occurrence has since assured me that it was purely accidental, and that the unfortunate subject of this enquiry was endeavouring to walk along the projecting stone wall on the outside of the bridge, when he slipped and fell.

The ascertained number of epileptic fits in 1868 has been 13,505—less than those of the previous year by 4,422.

I have failed, as on former occasions, to discover any connexion between certain seasons of the year and the frequency of epileptic paroxysms. It obviously cannot as yet be determined whether there is any causal relation between the dry season of the past twelve months and the large diminution of epilepsy above indicated.

The Turkish Bath has continued its successful career by extorting admiration from former unbelievers in its efficacy, increasing the confidence of its first supporters, and imparting health and strength to a very large proportion of those who have submitted themselves to its varied processes. Its structural enlargement would be a great boon to the Asylum for which I could not feel too grateful to the Committee. The individual bathing of Patients has reached the high figure of 600, the number of Patients themselves being 104, of whom 47 have been discharged as recovered. The Visiting Justices have heard from the mouths of many Patients, on discharge, how much they have attributed a speedy cure to the agency of that eastern blessing which is now becoming an institution also of the western world.

There have been 261 excursions outside the Asylum

grounds, including four pic-nics to Hadley Wood and one to Epping Forest. These have given 1,871 individual enjoyments to a considerable number of Patients. I can only repeat of these excursions what I said last year, that they relieve the monotony of life to the confirmed lunatics, while to the unconfirmed they constitute experimental trials of returning fitness for complete liberty.

The Male attendance has reached 3,447 at 21 different entertainments of the conjoined Departments.

The changes among the staff of Attendants have been frequent, but their conduct, with few exceptions, has been good.

Their Reading Room opened at the beginning of the year has been more appreciated since permission was given to its occupants to smoke.

If the executive of my Department has been somewhat embarrassed by the temporary withdrawal of a most efficient Assistant Medical Officer, to meet the pressing emergency occasioned by the illness of my colleague on the other side of the house, it is only fair to add that his temporary substitute is adapting himself steadily and carefully to his new duties.

While I trust the varied experience of the past year has not lessened the confidence of the Committee in myself, I beg to offer them my thanks for their valuable support, and to assure them that my highest ambition is to merit their good opinion.

EDGAR SHEPPARD, M.D.

12th January, 1869.

# REPORT

#### FROM

# THE FEMALE DEPARTMENT.

# TO THE VISITING JUSTICES OF THE MIDDLESEX COUNTY LUNATIC ASYLUM, COLNEY HATCH.

### December 31st, 1868.

#### GENTLEMEN,

I have the honour to submit the Annual Medical Report of the Female Department for the year just closed, together with the usual Statistical Tables.

On the 1st of January last there remained in the Asylum 1,215 Patients. During the year 168 have been admitted, being 9 more than in the previous year and 24 more than in 1866.

The total number under treatment during the year was 1,383, and the average number resident was 1,231.7.

The numbers fluctuated considerably, but maintained a high rate from March onwards, reaching their maximum in September, at which time there were 1,241 Patients resident; during December they have gradually diminished, and are lower on this day (1,227) than they have been at any previous period of the year since March.

301 Patients have been refused admission during the year.

What has been stated in former Reports may be repeated with regard to the character of the admissions: 46 were over 50 years of age, some were in extreme old age and very feeble, eight suffered from epilepsy, many were paralysed, 40 had previous attacks of mental unsoundness and had been under treatment in other Asylums, and two were pregnant.

Bodily debility and exhaustion were the rule.

The following short tables will show the operations of the year :---

In the Asylum, January 1st, 1868	1,215
Admitted during the Year	168
Total under treatment	1,383
Discharged Recovered	
" Relieved 17	
,, Not Improved 0	
Died	
Total Discharged and Died 156	
	156
	100
Remaining in the Asylum December	
31st, 1868 (including three who are	
absent on trial)	1,227
	ŕ
Of the cases admitted during the year there have	e been :
Discharged Recovered	21
" Relieved	2
" Not Improved	0
Died	17
Remaining	128
	·
Total	168

The form of mental disease in those admitted may be classed as under :---

Mania	101
Melancholia	41
Dementia	24
Congenital Idiocy	2
,	
Total	168

Of the Patients discharged recovered, 21 were admitted during the year, thus adding one more proof that insanity, if treated in an Asylum in its early stages, and not complicated with organic changes in the brain, is one of the most curable diseases.

The propertion of curable cases, which are mainly drawn from recent admissions, is, however, comparatively small, 30 being about the number that can properly be classed under that head.

Fourteen Patients have been removed to various workhouses during the year to admit of the reception of more acute cases.

The deaths, 86 in number (the same as last year), show a slight diminution in the mortality, the average number resident having been greater. Many aged, paralysed, and bed-ridden Patients died in the latter part of the year. They have all been from natural causes.

No case of suicide has occurred during the year, and this fact, considering the number of Patients reported suicidal, bears excellent testimony to the carefulness of the supervision. Several attempts have been promptly met and danger averted. Inquests have not been necessary in any case during the past year.

The seclusions have been few comparatively, and for as short periods as possible; in some cases special nursing has been employed to do away with this measure.

Restraint has not in any case been required.

As usual, phthisis pulmonalis, paralysis, and natural decay from age have been the chief causes of diminution in our numbers; in one case, however, a Patient with strangulated femoral hernia, which defied all attempts at reduction by taxis, was operated upon by Professor Marshall, of University College, but the Patient sank after.

Two Patients admitted pregnant were confined in the Asylum—one was in the last stage of general paralysis when labour came on, but she was safely delivered of a still born child at the full period of gestation.

The other, a Patient labouring under acute mania, with destructive tendencies, was safely delivered, and the child removed from the Asylum soon after.

No casualties of a serious character have occurred; in one case the humerus was fractured, and in two the bones of the forearm; they were each produced by accidentally falling; they were inquired into by the Committee, and all the Patients made perfect recoveries.

Four Patients escaped—one from the Laundry Drying Ground, two from the Airing Courts, and one from No. 4 Infirmary Ward;—they were all speedily brought back.

The Turkish Bath has been repeatedly used throughout

the year, and there can be no doubt that, in a certain class of cases, it is a remedial agent of great value. Considerable benefit has been derived by some of the Patients from its use.

The occupations and amusements of the Patients continued much the same as in former years; every encouragement is given to promote both. Needle, domestic, kitchen, and laundry work form the principal occupations. In the summer the Patients frequently walk beyond the premises; picnics and tea parties are held in the grounds of the Asylum, games of various kinds in the Airing Courts, &c.

In the winter, dancing and musical parties are frequently held in the wards; the Patients encouraged in visiting each other in the evening, &c.; and dances take place from time to time in the large halls.

The annual summer and winter entertainments are much appreciated; in the former, the Patients spend a happy day in unrestrained communication with their friends; and the latter is long looked forward to, enjoyed when it comes, and forms a topic of conversation for some time afterwards.

Many Patients have visited their friends in London and other places under proper care, and they are very grateful for the privilege.

In the month of October the alarming and dangerous illness of Mr. Marshall threw a gloom over the whole Asylum, and there was a general outburst of sympathy. The most anxious and kind inquiries were made for him day by day, and when the storm was weathered and he began to rally, as much cheerfulness was everywhere apparent. It is a great cause for gratitude that so valuable a life has been spared.

In conclusion, I can only tender my thanks to those who, at a very trying time, ably seconded me with their help. All seemed animated with a desire to do what they could to assist me in maintaining the well-being of the Asylum.

To the Committee, for the trust and confidence they have placed in me, I return my sincere thanks.

I have the honour to be,

GENTLEMEN,

Your obedient Servant,

JAMES ADAM, M.D.

JAMES ADAM, M.D.

COLNEY HATCH LUNATIC ASYLUM, 31st December, 1868.

.

·

# CHAPLAIN'S REPORT, 1868.

THE Chaplain has the honour to submit his Report for the year 1868, to the Committee of Visitors.

Early in the year, in conformity with a Resolution of the Committee, he was licensed by the Bishop of London to his office as Chaplain of the Asylum.

The Chapel Services have been duly conducted. The behaviour of the Patients at the morning and afternoon Services on Sundays (and at other times) is very orderly, interruptions are of infrequent occurrence. The Responses, Chants, and Hymns, are heartily joined in. By reference, however, to the Chapel Returns, the numbers in attendance appear to be considerably fewer than formerly.

The Holy Communion is now celebrated as a separate Service. It commences at 10.15, and is concluded in time to begin the usual Morning Prayer at 11. By this arrangement the communicants are saved from the fatigue and liability to excitement consequent upon attendance on a preceding Service.

An additional celebration of the Holy Communion has been instituted on the 3rd Sunday of the month, at the same hour, thereby lessening, with advantage, the interval between Communion Sundays. The Household Sunday Evening Service is fairly attended, considering that it commences immediately after the release of the congregation from the labours of a long day. The Service is rendered as hearty and cheerful as practicable by imparting to it somewhat of a choral character. It will be kept within such limits as to allow due time for subsequent refreshment.

In addition to the established daily Morning and Evening Prayers, a Service, on Friday Evenings, consisting of Litany, Hymns, and Lecture, has been commenced in the course of the year, for the convenience of the Household. The attendance, though not numerous, yet affords evidence that this additional opportunity for worship is not unvalued.

After the Friday Evening Service the organist is in readiness to practise the Hymns and Chants for the ensuing Sunday Services.

During Holy Week an appropriate Service was held each evening at 8.15. Many were thereby enabled to commemorate the season who might not have been able to attend the previous Services. On Good Friday the attendance was remarkably full.

The Burials in the Cemetery during the year were 121. The practice has been adopted, with the approval of the Visitors, of reading the Psalms and Lessons in the Chapel, previous to performing that portion of the Burial Service which is read in the Cemetery. Many of the mourners have been spoken to by the Chaplain, who, in several instances, has also given a memorial card in remembrance of the deceased. The rare occurrence, within Asylum precincts, of a baptism took place in the household of one of the employés, whose child was privately baptised in consequence of its urgent illness.

Occasions have arisen for the use of the office for the communion of the sick. One of these was at the deathbed of Emma Jane Kaiser, an Attendant. The early death of one who appears to have won the regard of her associates, elicited general sympathy on the female side of the house. The Chapel Service on the Sunday Evening after her death bore reference to that event, and attracted a large number of Nurses, who attended in token of respect to the deceased.

In the month of June, one Female Head Attendant and fourteen Nurses were confirmed by Bishop Anderson (acting for the Bishop of London) in the parish Church of Hadley. The arrangements for the conveyance of the party were excellently conducted.

Through the kindness of the Committee, which the Chaplain desires here to acknowledge, substitutes were provided to undertake his duties during his three weeks' absence in the summer. The Sunday duties were performed by the Rev. J. Watson, Head Master of the Grammar School, Stockwell. The Week Day Services by Rev. William Roberts, of Colney Hatch.

During the two Sundays of the Chaplain's absence the Household Services were suspended by consent.

The general Wards have been regularly, and the Infirmaries very frequently visited, and the Patients have been addressed and ministered to as occasion offered. Some interesting correspondence (especially in the case of a foreign patient of high literary attainments) has passed between the Chaplain and friends of patients.

A large, but not excessive supply of Bibles, Prayer, and Hymn Books, has been received and distributed.

The periodicals have been regularly circulated, according to the requirements of the varied Wards. An addition to the Library is much required of works of *Fiction* and other *light Literature*.

A Writing and Reading Class for Females has been formed, which meets on Wednesdays from 3 to 4 p.m. Though no great results can be expected from so unassuming an effort, yet it is hoped that some profit may be gained by regular frequenters of the Class.

The Chaplain's New Year's Address, printed under the sanction of the Committee has been kindly received by the Household.

The decorations of the Chapel at Christmas gave a very cheerful aspect to the building.

Two Missionary Addresses have been given in the Chapel, on Friday Evenings. It is hoped, with the sanction of the Committee, to establish a voluntary Missionary Association from Members of the Household.

One of the last ministerial acts which the Chaplain performed in the past year was the burial of Mr. Underhill, the gate keeper of the Lower Lodge. His death, nearly cotemporaneous with that of another Servant of the establishment, formed a melancholy incident in the close of the old year.

In offering the foregoing remarks to the notice of the Visitors, the Chaplain ventures to hope that no important matter belonging to his department has been unnoticed, and he trusts that he may be permitted, in conclusion, to express his acknowledgments for the kind consideration with which he has been received in this Asylum, in the fulfilment of his first year of ministerial duty.

## HENRY HAWKINS, M.A., Chaplain of the Middlesex County Asylum, Colney Hatch.

January, 1869.

# THE STEWARD'S REPORT.

31st December, 1868.

My Lord and Gentlemen,

The usual annual Returns and Accounts relating to the Steward's department are herewith submitted.

The Farm has been productive during the year, and shows a net profit of  $\pounds 855\ 12s.\ 7d.$  The cows are healthy, and some promising young stock has been reared for the dairy.

Vegetables have been grown in abundance, both in the gardens and on the farm; and the House has been constantly and liberally supplied. The following are the crops which have been planted on the Farm during the year, viz.: oats, mangold, turnips, rye-grass, tares, cabbage, winter greens, peas, and beans. The liquid manure was found of great benefit during the drought of the summer.

The gardens have yielded vegetables of various kinds, as also a plentiful store of fruit.

The estimated earnings of the trades, according to the Returns, after deducting journeymen's wages, are—

		£	<i>S</i> .	d.
Tailors' shop	• •	794	17	$11\frac{1}{2}$
Shoemakers' shop	• •	<b>224</b>	<b>2</b>	9
Upholsterers' shop	• •	<b>269</b>	3	5

85

All the clothing for the Patients of both sexes is made in the Asylum, and the repairs are properly attended to. The whole of the attendants' uniforms are also made and repaired in the Asylum.

The cloth and canvas boots and shoes have been made in the shoemakers' shop, and the whole of the boots and shoes have been repaired here.

The mattresses, pillows, padded rooms, and strong bedding and clothing have been made and repaired in the upholsterers' shop.

The Steward is pleased to be able to report to the Committee at the close of the year, that the conduct of the officers and servants of his department has been generally very good.

During the year the following improvements and alterations have been carried out, viz. :---

General Bath Room, containing 20 baths on female side, has been completed and brought into use.

Old Bath Rooms on female side converted into bed rooms, and accommodation for 21 additional Patients obtained.

The stables and coach house at entrance lodge, hitherto of little service, have been converted into 2 small wards, with necessary offices for the reception of infectious cases.

Additional ventilation has been effected in Wards 19, B2, B3, E2, and E3.

Gas lights have been placed in Dormitories of E 2 and Infirmary 4.

Nine earth closets have been substituted for those with water, in the Airing Courts.

I have the honour to be, My Lord and Gentlemen, Your most obedient Servant, GEORGE H. HENDERSON.

To the Committee of Visitors, Colney Hatch Asylum.
